Summary

A software developer with over 2 years of commercial experience with Ruby on Rails. I am eager to improve my skills and grow with the company. I work well in teams and am known as a responsible and reliable employee.

Work Experience

August 2022 - present day, Ruby on Rails developer, CyberCraft

Shopify SEO Plugin

The Shopify SEO plugin identifies and resolves SEO issues for users' Shopify stores, either automatically or with recommendations.

Responsibilities included:

- Server-side development;
- Development of integrations with various services, such as Shopify API, Customer IO;
- Upgrade versions for Ruby, Rails, and gems;
- Implement storing historical data and viewing it in UI analytics;
- Developing features for the admin panel;
- Writing automated tests using Rspec.

Environment: Ruby, Rails, Shopify API, SQL, GIT, ngrok, Testing (RSpec, FactoryBot), PostgreSQL, Sidekiq.

Collectible Cards

This project provides the user with information about collectible cards and their sales ranking. Uses graphs, tables, and images of the cards. The project includes a mobile application that allows the user to get information by scanning the card or by its photo.

Responsibilities included:

- Server-side development;
- Frontend-side development;
- Developing features for the Android mobile app;
- Writing automated tests using Jest.

Environment: Express.js, Next.js, React Native, Android Studio, MongoDB, GIT, Jest, Docker.

Product Information Platform

The platform provides users with detailed product information, categorized by type, with full descriptions and purchase recommendations.

Responsibilities included:

- Server-side development;
- Developing features for the admin panel;
- Writing automated tests using Rspec.

Environment: Ruby, Rails, SQL, GIT, Rspec, PostgreSQL.
